About Me

I am looking for a position that challenges me in new and exciting ways and helps me grow as a developer in a real-time environment. Extremely motivated to constantly develop my skills.

Projects

Tourist-Javvist App

Role: Developer

Objective: An app that focuses on users who want to get ideas about what happens in the city a little more spontaneously than traditional apps.

Environment: Android Studio, GIT, SQLite

TeleCom App

Objective: An app (Ericsson) that measures signal strength and GPS positions and display it on a map in the form of heat map. In addition, the app should also be able to save data in log files and be able to ping optional servers.

Environment: ReactNative, GIT.

GreenCal App

Objective: A front-end app where the user can organise their plants based on their weather conditions with calendar and along with to-do list function.

Environment: Vue CLI, GIT, Firebase.

Work Experience

Role: Technical Recruiter

Experience: 2.5 Years

Responsibility: Handling the whole recruitment process for both IT & Non-IT requirements.

VISA Details

- Holder of valid visa to work in Sweden(PR).
