### About Me

I am looking for a position that challenges me in new and exciting ways and helps me grow as a developer in a real-time environment. Extremely motivated to constantly develop my skills.

### Projects

#### Tourist-Javvist App

Goal: An app that focuses on users who want to get ideas about what's happening in the city a little more spontaneously than traditional apps.  
Environment: Android Studio, GIT, SQLite

#### GreenCal App

Goal: A frontend app where the user can organize their plants based on weather conditions, with a calendar and a to-do list feature.  
Environment: Vue CLI, GIT, Firebase.

#### DGGG App

Goal: An app that enables employees to participate in positive and helping activities in their free time, and in return, they are rewarded by the company with time bank hours. The app also has a built-in chat function and a common wall where employees can communicate and share posts and their thoughts..  
Environment: React JS, React Native, Typescript, GIT, Firebase.

### Work Experience

#### Role: Frontend developer Intern

##### Company: Technogarden

Experience: 5 months [Feb 2024 - June 2024]

**Responsibilities:** Development and implementation of the entire frontend for an interactive chat function within the internal application DGGG,

#### Role: Technical recruiter

Experience: 2.5 years

##### Company: CPG & Wings International

**Responsibilities:** Managed the entire recruitment process for IT and non-IT positions, including job posting, sourcing, interviewing and candidate onboarding.
